**EX PARTE SUPPLEMENTAL COMMENTS OF THE  
ARIZONA CORPORATION COMMISSION**

The Arizona Corporation Commission ("Arizona Commission") submits these Ex Parte Supplemental Comments for the purpose of providing a very limited update to its data filed with its Reply Comments in this Docket. Attached to these Comments are new charts containing in addition to the data we filed with our Reply Comments, new access line data by zip code received from AT&T and McLeodUSA with respect to their market shares in the Phoenix MSA, as well as revised data from Integra.

The attachments also contain pages from our Reply Comments which we have updated with this data so the FCC could understand its impacts. We have also updated the exhibits from our Reply Comments with this data. Finally, we have attached several new exhibits to give the FCC concise information as to the results of the data collected by the Arizona Commission to-date.

Our analysis of the data indicates that the only material change to the data we originally filed is with respect to AT&T's market share in the large business market (over 100 lines) in the Phoenix MSA. However, the extent to which AT&T provides its own transport and last mile facilities is not known. It is the Arizona Commission's belief that

AT&T uses a combination of its own facilities as well as Qwest's in providing service to large business customers in the large business market.

RESPECTFULLY submitted this 23rd day of June, 2008.

/s/ Maureen A. Scott
